

## Our Service and Experience

**We manage the JOB from START to FINISH.**

*Mustang* has installed over 50,000 payment terminals in Malls, Department Stores, Supermarkets, C-Stores, Petroleum, Video, Fast Food, and Restaurants.

We have programmed and installed all the current POS and payment systems, including products from Hand-Held Products, Hypercom, Symbol, VeriFone, and many others. We have the capability to "*drill the holes, run the wires, mount the equipment, load the software, confirm the operation, and train the user.*"

*Mustang* is an expert in ANSI debit security and key encryption. We operate a secure depot for DUKPT key injection and provide debit system consulting to retailers, manufacturers, and equipment distributors.

We eliminate the mysteries of Key Injection and Debit Security. We are fully trained and equipped to handle all debit terminal security issues. We provide secure Key Injection (DUKPT and Triple-DES Master/Session) and offer our extensive knowledge to assist you as you implement debit. *Mustang* continues to invest in knowledge, facilities and management to meet all of both today's and tomorrow's challenges.

### Let "One Stop" take care of business!

In addition to the installation and deployment of your initial POS system and terminals, *Mustang* offers a "**One Stop**" program for the future deployment, support, and protection of ALL of your debit terminals.

Under one agreement with the retailer, *Mustang* manages complete deployment, service replacement, and inventory of your debit terminals, or any combination of these services. *Mustang* is a fully certified facility with extensive knowledge of POS/Debit Transaction Systems, Security Controls and Network Installation Services.

... from START to FINISH!
